Native Animal #1:

PICK A MAMMAL

What do they look like? What signs do they leave?

A large rectangular area enclosed by a dotted line, intended for drawing or writing.

What habitat do they prefer?

Do they live here all year?

What do they eat?

What predators do they have?

Do they live alone or in groups?

How many young do they raise in a year?

What is their estimated local population or conservation status?

Do they face any threats to their way of life?

Why are they important in this ecosystem?

Native Animal #2:

PICK A REPTILE

What do they look like? What signs do they leave?

A large rectangular area defined by a dotted border, intended for drawing or writing. The border is composed of small black dots forming a continuous line around the perimeter of the page.

What habitat do they prefer?

Do they live here all year?

What do they eat?

What predators do they have?

Do they live alone or in groups?

How many young do they raise in a year?

What is their estimated local population or conservation status?

Do they face any threats to their way of life?

Why are they important in this ecosystem?

Native Animal #3:

PICK AN AMPHIBIAN

What do they look like? What signs do they leave?

A large rectangular area enclosed by a dotted line, intended for drawing or writing.

What habitat do they prefer?

Do they live here all year?

What do they eat?

What predators do they have?

Do they live alone or in groups?

How many young do they raise in a year?

What is their estimated local population or conservation status?

Do they face any threats to their way of life?

Why are they important in this ecosystem?

Native Animal #4:

PICK A FISH

What do they look like? What signs do they leave?

A large rectangular area enclosed by a dotted line, intended for drawing or writing.

What habitat do they prefer?

Do they live here all year?

What do they eat?

What predators do they have?

Do they live alone or in groups?

How many young do they raise in a year?

What is their estimated local population or conservation status?

Do they face any threats to their way of life?

Why are they important in this ecosystem?

Native Animal #5:

PICK A BIRD

What do they look like? What signs do they leave?

A large rectangular area enclosed by a dotted line, intended for drawing or writing.

What habitat do they prefer?

Do they live here all year?

What do they eat?

What predators do they have?

Do they live alone or in groups?

How many young do they raise in a year?

What is their estimated local population or conservation status?

Do they face any threats to their way of life?

Why are they important in this ecosystem?

Native Animal #6:

PICK AN INSECT

What do they look like? What signs do they leave?

A large rectangular area defined by a dotted border, intended for drawing or writing. The border is composed of small black dots forming a continuous line around the perimeter of the page.

What habitat do they prefer?

Do they live here all year?

What do they eat?

What predators do they have?

Do they live alone or in groups?

How many young do they raise in a year?

What is their estimated local population or conservation status?

Do they face any threats to their way of life?

Why are they important in this ecosystem?

Native Animal #7:

PICK AN **ARACHNID, CRUSTACEAN, MOLLUSK,** OR OTHER CREATURE OF YOUR CHOICE

What do they look like? What signs do they leave?

A large rectangular area enclosed by a dotted line, intended for drawing or writing.

What habitat do they prefer?

Do they live here all year?

What do they eat?

What predators do they have?

Do they live alone or in groups?

How many young do they raise in a year?

What is their estimated local population or conservation status?

Do they face any threats to their way of life?

Why are they important in this ecosystem?

Now...

PICK AN INVASIVE SPECIES

What do they look like? What signs do they leave?

A large rectangular area enclosed by a dotted line, intended for drawing or writing.

What is their native habitat?

How did they get here?

What do they eat?

What predators do they have?

How many young do they raise in a year?

Which native species are they directly affecting and how?

What effect are they having on the ecosystem as a whole?

Is anything being done to control their population?
